Subject: Recognition of Contribution - ITU Journal: *ICT Discoveries*

Dear Prof. Rajkumar Buyya,

The ITU Journal: *ICT Discoveries* was launched in 2017 as the online, academic journal of the International Telecommunication Union, publishing original research on ICT technical developments as well as their policy, regulatory, economic, social, and legal dimensions. Since then, this journal has successfully produced four special issues exploring a range of topics related to advanced technologies, their impact on society and their future applications.

The recently concluded special issue on [*The future of video and immersive media*](#), marks the final issue to be published under the banner of the ITU Journal: *ICT Discoveries*, as we prepare to embark on a new chapter in the publication of ICT research.

I would like to take this opportunity to acknowledge your contribution to the ITU Journal: *ICT Discoveries*, in your role as Associate Editor-in-Chief, and to thank you for your part in the development of the publication. I look forward to the chance to work together again and trust that with our established relationship, there will be future opportunities to collaborate and ensure that the academic contributions to ICT technical advancements are encouraged and accessible the world over.

Yours sincerely,

A handwritten signature in blue ink, appearing to read 'Chaesub Lee'.
